SECTIONAL SPOT REPAIR SYSTEM: STYRENE-FREE SILICATE RESIN

Perma-Liner's proprietary two part silicate resin system is highly chemical resistant, heat resistant and self-extinguishing. This resin can be used in critical areas such as the chemical industry, airports, tunnels, municipal utilities, sewer laterals and more. Perma-Liner's silicate resin has no volatile organic compounds (VOC) and absolutely no styrene. This silicate resin can be used in a wide range of ambient temperatures with predictable and consistent cure times. The Sectional Spot Repair system has negligible shrinkage and excellent bonding to all host pipe materials.

**POT LIFE:
25 MIN.**

**CURE TIME: UNDER
3-HOURS**
